As a trusted SAP implementation partner, our implementation executive helps the customer to reach the higher position in their enterprise operations by giving customized services:

- End-To-End Solution Provider
- Team of Skilled and Experienced Professionals
- Effective and Rapid Project Management
- Affordable Implementation Services
- Customer Satisfaction
- Business Process Optimization and Re-Design

Implementation Methodology

- Project Planning
- Analysis & Design
- Realization
- Final Preparation
- Go-Live
- Post Go-Live Support

Project Planning

- Team Formation
- Project Kick-off meeting
- Project Schedule

Project first phase starts by conducting kick off meeting during which the project team and process owners come to know about project charter and objective and then allocated their responsibilities in execution of the project. The implementation team sets up the plan of approach, formulating a detailed project schedule, functional areas to be cover, understanding business work flow & organization structure.

Analysis & Design

- Data Collection Templates
- Business Processes
- Business Blue Print Document

In the second phase series of meetings need to be conducted with various key stakeholders to define project objectives, scope, and the relevant business process scenarios which is further documented in the form of Business Blue print document. Business Blue print document is a detailed documentation that serves as functional and technical guide during the subsequent phases of implementation.

Realization

- Basic Configuration
- Validate organizational configuration & business processes
- Sample test cases

In this phase implementation consultant start configuring all the business processes and as per business blueprint document all the technical requirements. Configuration activity covers configuration of organizational structure, all of master data, regular business transactions & business process. In this phase consultant performs sample testing which gives confirmation that all requirements are being met in the system.

Final Preparation

- Basic Configuration
- Validate organizational configuration & business processes
- UAT
- End User and Admin User Training

Final Preparation phase is prior to handover & go-live process phase and at the end of this phase system is ready to be used. In this phase all configuration and mapping will be get tested to perform UAT. During this phase training will be conducted for key end users and administrator. As a part of final system tests, all the change requests / modifications if any exist then it will get resolve. After final system test, implementation consultant starts preparing production environment.

Go-Live

- Monitor live environment
- Go-live
- Project Handover

This is the final phase of the project where our team take system from pre-production environment to a live production operation. In this phase our main role is to monitoring system performance and providing support to your team for doing regular day to day transactions.

Post Go-Live Support

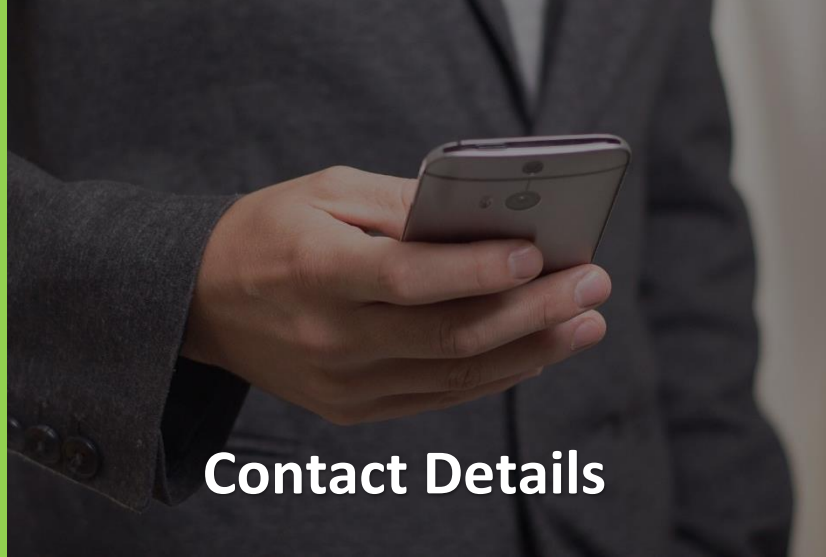

- Post Go-live Support

At the end of this phase our team handing over system to you with formal project sign-off and then onwards our post go-live support starts.

Implementation Services

To serve specific needs of our customer's business process requirement, we developed many add-on modules integrated with SAP Business One Solution. While design & development of add-on modules, our technical team keep in mind it's various operational requirements to different enterprises.

- Job Work
- SME Engine
- Quality Control
- Sales CRM
- Payroll
- Preventive Maintenance
- Power Plant Monitoring System
