

Trust Systems & Software (i) Pvt. Ltd.

### RTGS / NEFT

Over the recent past, The RBI has taken multiple steps for improving the Electronic Payments Network in India. The Banks have responded equally and a number of banks have opted for membership to the INFINET Indian Financial Network. Corporates and merchants, who bill and collect large value payments, have a challenge of sighting and reconciling funds received through Real-Time Gross Settlement System (RTGS) and National Electronic Fund Transfer (NEFT). Our team has been focused on Payment Systems like RTGS / NEFT / SWIFT etc. and has successfully installed and/or migrated various banks. With our in-depth understanding of the regulatory and compliance processes, and our Project Management expertise we have an impeccable record of getting banks quickly go-live.

Ready to take on unique business challenges, we deliver quality results, on time and within budget. Trust is having large team of dedicated, qualified and experienced professionals, a panel of industry experts and consultants for specialized projects to give you the best results.

---

The NG-RTGS application from RBI is available in three options:

1. Structured Financial Messaging System Member Interface (SFMS-MI).
2. Web Application Interface in the form of Web Service Interface (WEB-API)
3. Payment Originator (PO) Module accessed over the INFINET network.

# Features
