

MNRL C-DOT

Integration

Solution

Connecting your Core Banking System with the
MNRL C-DOT platform securely and efficiently

**Secure
Integration**

**Regulatory
Compliance**

**Seamless
Connectivity**

What is the MNRL C-DOT Portal?

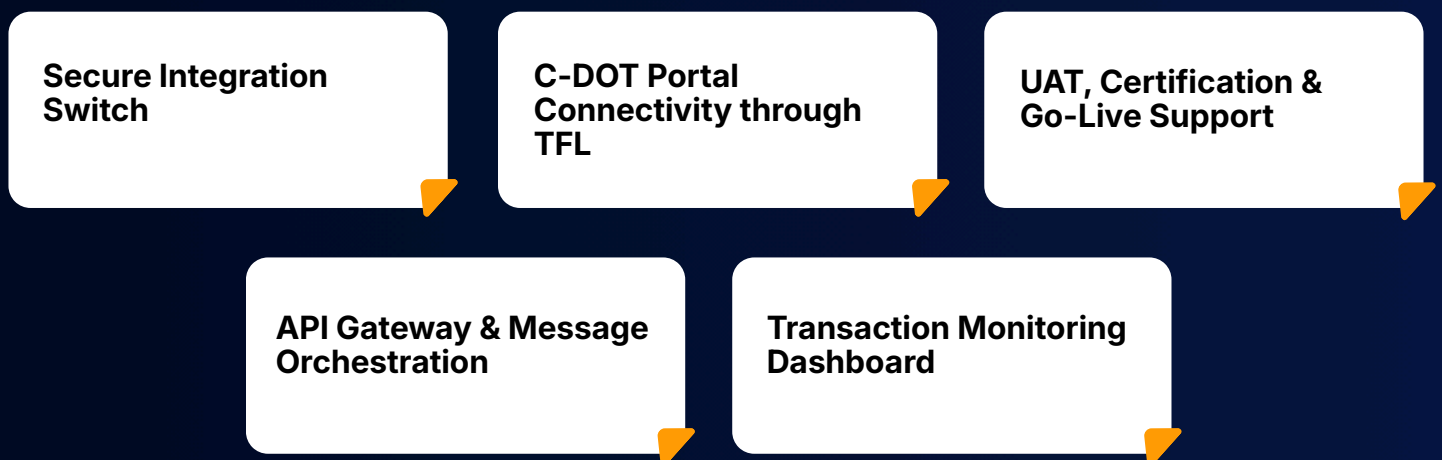

- ✓ Centralized government platform for secure regulatory banking operations
- ✓ Supports account verification, freeze, release, and lien management
- ✓ Enables secure CBS connectivity through Trust Fintech's integration platform

Trust Fintech's MNRL C-DOT Integration Solution

Trust Fintech delivers a API based integration platform that securely connects your Core Banking System with the **MNRL C-DOT** Portal. The solution simplifies regulatory connectivity through secure APIs, centralized monitoring, and compliance-ready integration

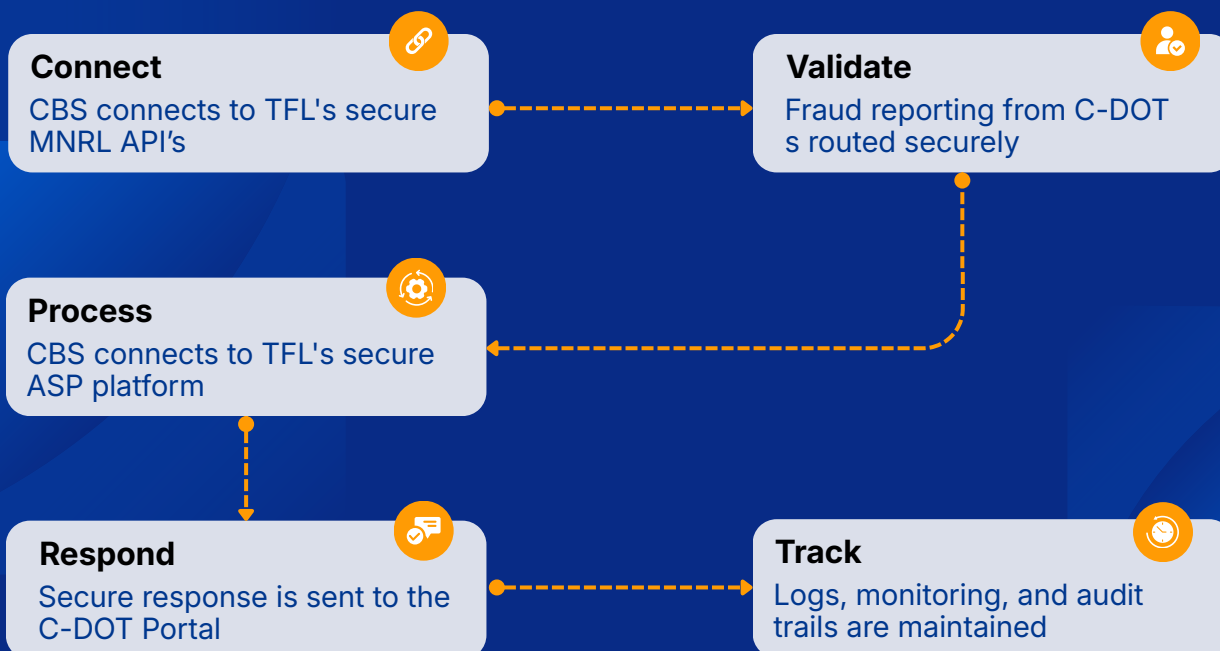

What Trust Fintech Provides

How It Works

Whether your bank uses **Trust Fintech's CBS** or a third-party Core Banking System, our centralized integration platform ensures secure, seamless, and compliant connectivity with the **MNRL C-DOT** Portal.

Key Features

Installation at Existing Data Center –
No dedicated integration infrastructure required

Direct C-DOT Connectivity –
Simplified, centralized connectivity to the C-DOT ecosystem

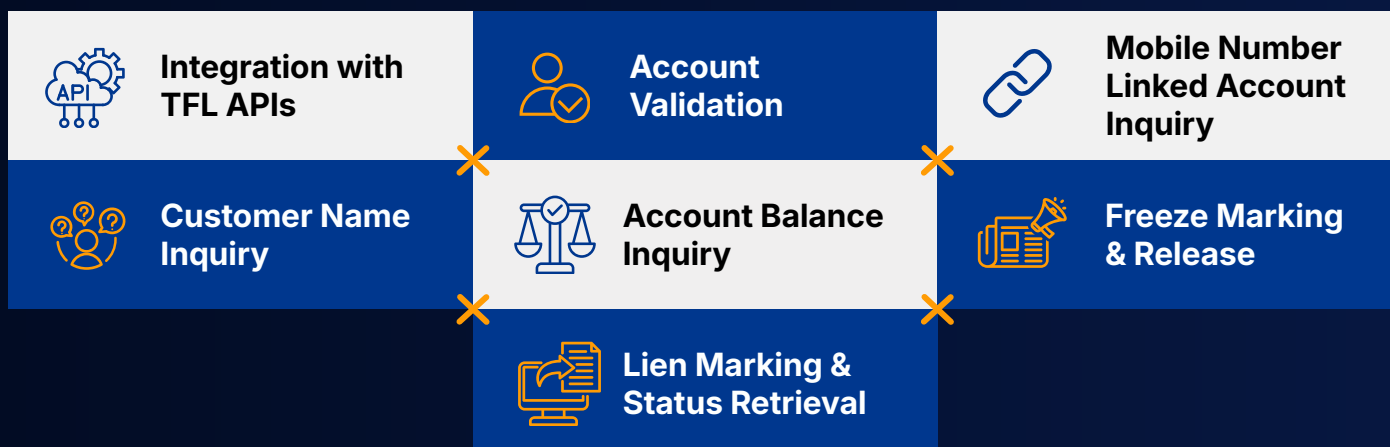

Secure API Integration –
Standardized APIs with encrypted communication and authentication

Transaction Monitoring Dashboard –
Real-time tracking, audit logs, and MIS reporting

Advanced Security Framework –
Encryption, IP whitelisting, and secure authentication

End-to-End Implementation Support – From onboarding to go-live and post-implementation support

Supported Banking Operations

Benefits

Faster Regulatory Readiness

Accelerate C-DOT integration with a deployment-ready platform

Lower Total Cost of Ownership

Reduce infrastructure and operational costs

Seamless CBS Integration

Connect with TFL or third-party Core Banking Systems using standardized APIs

Simplified Compliance

Automate workflows with secure communication and audit-ready monitoring

Enterprise-Grade Security

Protect banking data with encryption and secure API management
