Smarter **Decisions**. Stronger **Business**. Powered by
SAP Business One

SAP B1 Implementation

Scale up the business to new heights with SAP Business One!

Streamline your processes by using ERP software that grows with you. Streamline key processes, gain greater insight into your business, and make decisions based on real-time Information – so you can drive profitable growth. The team at Leverage Technologies has implemented hundreds of ERP implementations and global rollouts. Our longstanding Experience with SAP Business One implementation makes us an accomplished business partner in advisory, implementation, and support. An experienced SAP Business One partner with knowledge and Experience in your industry will have previously configured SAP Business One for similar requirements to yours, and will have pre-written reports and functional sets for your industry.

We are specialized in implementing **SAP BUSINESS ONE** with an impeccable record for On-Time Implementation and 24/7 Support Services.

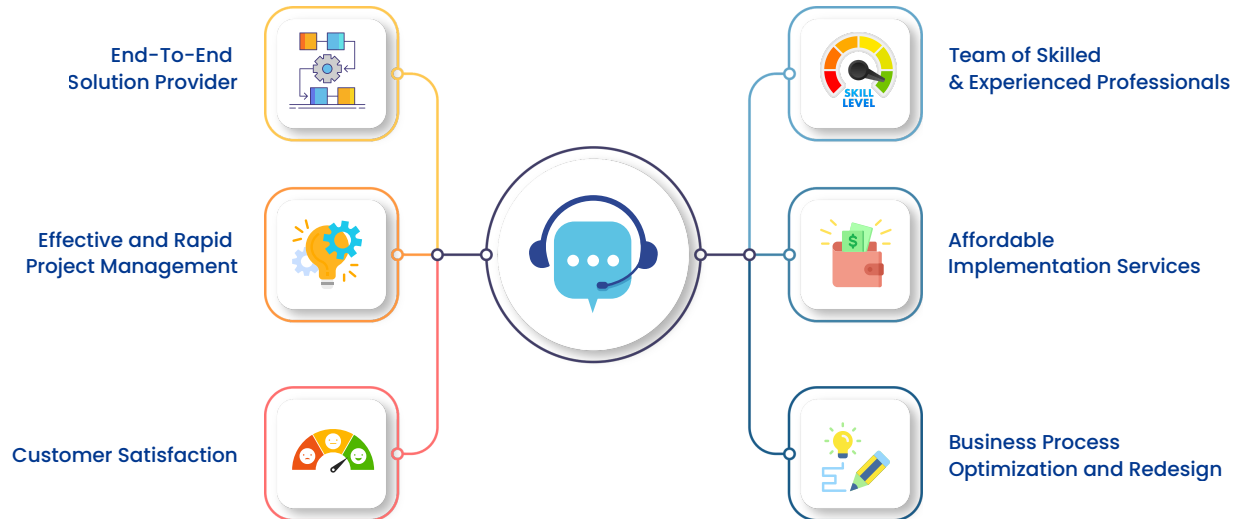

Why Choose SAP BUSINESS ONE

A solution designed to enable growing small to mid-sized enterprises (SMEs) and large enterprises. If the company has outgrown its small accountancy software, now is the time to discover how SAP Business One can make life simpler.

Discover the small business management solution designed with financials, sales, CRM, analytics, inventory management, reporting, and much more in one, easy-to-use solution, and have everything needed to manage a unique business.

As a trusted SAP implementation Partner, our Implementation executive helps the customer to reach a higher position in their enterprise operations by giving customized services:

Implementation Methodology

- Project Planning
- Analysis & Design
- Realization
- Final Preparation
- Go-Live
- Post Go-Live Support

Project Planning

- Team Formation
- Project Kick-off meeting
- Project Schedule

Project's first phase starts with conducting a kick-off meeting during which the project team and process owners come to know about the project charter and objective, and then allocate their responsibilities in the execution of the project. The implementation team sets up the plan of approach, formulating a detailed project plan schedule, functional areas to be covered, understanding business workflow & organization structure.

Realization

- Basic Configuration
- Validate organizational configuration & business processes
- Sample test cases

A solution designed to enable growing small to mid-sized enterprises (SMEs) and large enterprises. If the company has outgrown its small accountancy software, now is the time to discover how SAP Business One can make life simpler.

Discover the small business management solution designed with financials, sales, CRM, analytics, inventory management, reporting, and much more in one, easy-to-use solution, and have everything needed to manage a unique business.

As a trusted SAP implementation Partner, our Implementation executive helps the customer to reach a higher position in their enterprise operations by giving customized services:

Final Preparation

- Basic Configuration
- Validate organizational configuration & business processes
- UAT
- End User and Admin User Training

Final Preparation phase is prior to the handover & go-live process phase, and at the end of this phase system is ready to be used. In this phase, all configuration and mapping will be tested to perform UAT. During this phase, training will be conducted for key end users and administrators. As a part of the final system tests, all the change requests/modifications, if any exist then it will be resolved. After the final system test, the implementation consultant starts preparing the production environment.

Go-Live

- Monitor live environment
- Go-live
- Project Handover

This is the final phase of the project where our team takes the system from the pre-production environment to a live production operation. In this phase, our main role is to monitor the system performance and provide support to your team for doing regular day to day transactions.

Post Go-Live Support

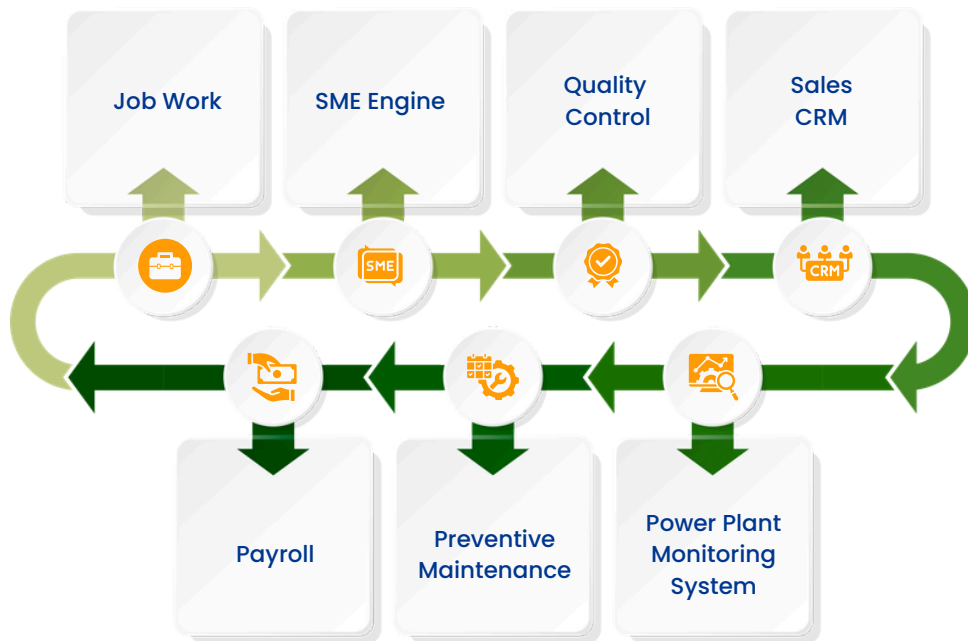

- Post Go-live Support

At the end of this phase, our team will hand over the system to you with formal project sign-off, and then our post-go-live support starts.

Implementation Services

To serve the specific needs of our customers' business process requirements, we developed many add-on modules integrated with the SAP Business One Solution. While designing & developing add-on modules, our technical team keeps in mind's various operational requirements of different enterprises.
